Permanent Hair Removal

(OPT, SHR, IPL, RF, E-Light)

SHR (Super Hair Removal) utilizes a proprietary method to target hair follicles, *in the active growth phase*, and destroy them painlessly while also providing simultaneous cooling, resulting in permanent hair removal.

The SHR laser delivers permanent, pain-free and safer hair removal.

G5 Massage

(Relax, slimming, cellulite)

G5 Massage is a mechanical massager that goes much deeper than the therapist can. Different heads are used to mimic different massage techniques.

The massage head is driven to turn in gyratory motions, moving round and round, up and down and side to side with pressure, providing a deep massage.

The G5 is excellent for toning, increasing circulation and aiding in the breakdown of fatty deposits and cellulite. It is particularly good for back, shoulders, thighs, hips, buttocks and stomach.

This form of massage stimulates deep blood flow and, therefore, can be used to relieve very tender areas where deep manual massage may be too painful. It can also be incorporated into your slimming program to help break down cellulite. Best if done twice a week for 8 to 10 sessions. Monthly maintenance is recommended thereafter.

G5 Massage	Price
G5 - Massage - Focused Body Area (30 min)	310
G5 - Massage - Focused Cellulite Area (30 min)	415
G5 - Massage - Back, Neck & Shoulder (45 min)	465
G5 - Massage - Full Body (60 min)	625
G5 - Slimming Massage - 30 min - 1 Session	325

The G5 massage provides the following benefits:

- Aids exfoliation process
- Cellulite reduction
- Lymphatic drainage
- Improves circulation to joints
- Trigger point therapy
- Relieve pain
- Relaxes contracted tense muscles
- Improves skin texture and increases skin elasticity
- Increases circulation
- Hastens elimination of wastes/toxins
- Stimulates sensory nerve endings
- Promotes relaxation and better sleep
- It is a wonderful accompaniment for weight-loss programs.

WHAT'S NEW !

Dry Vacuum Cupping

(Butt Lift, Breast Lift and other areas)

Vacuum cupping with pulsating suction can be used on various parts of the body that includes the breasts, buttocks, back, legs, stomach and chest

A Vacuum breast lift is a non-surgical breast lift treatment that is safe and has enormous effects. The treatment focuses on pectoral muscles, helping lift loose skin in the process. It also helps lymph and blood circulation to the breast, which can help soften localised fatty deposits. This revolutionary breast enhancement treatment lifts and shapes your breast helping you to achieve that confidence and appearance you want.

The side effects of the treatment are minor. A slight sensitivity that lasts for a few days and mild redness are some of the side effects. This side effects won't prevent you from doing your daily duties. The results may vary depending on the number of treatment you want. You will require anything between 1 and 8 treatment sessions for constructive results.

A Vacuum butt lift is a non-surgical butt lift treatment that is safe. The procedure involves the use of vacuum to melt the fat pockets (those areas that are seen as dimply or lumpy areas in the buttocks) and re-position the malleable fat to lift the buttock contours. The added benefits, as well as giving the desirable look, are that it reduces loose skin and cellulite from the buttock and thighs. Any broken-down fats that are in excess are disposed of naturally through the lymphatic system.

Dry Vacuum Cupping	Duration	Sessions

Body Areas					
Body - One Area	20	310	885	1 730	2 510
Butt Lift	30	595	1 695	3 320	4 820
Breast Lift	45	995	2 835	5 550	8 060
Back	60	1 200	3 420	6 695	9 720
Stomach	60	1 400	3 990	7 810	11 340

Benefits:

- No injections. No knife, non-invasive
- Great for breast health and it's effective.
- No scars. Almost risk free, the risk really are small compared to the surgical option
- Nothing foreign in your body, to move or cause problems
- No recovery time. Stop when you want
- Low cost

WHAT'S NEW !

Plasma Pen / Fibroblast

Plasma Pen 'fibroblasting' is a highly versatile & non-surgical procedure that's highly effective in wrinkle smoothing, eyelid tightening & eyelid hood reduction (blepharoplasty) and able to treat, repair, lift & rejuvenate any area of the skin to improve & brighten the skin tone, laxity & texture. It will also significantly tighten loose skin and will dramatically reduce, inflate & plump lines & wrinkles.

The Plasma Pen creates a minuscule electrical arc at its tip. This arc is called the plasma-arc and consists of a small plasma bubble consisting of ionized molecules to produce energy.

When the plasma-arc touches the skin (solid), it **vaporises** as a gas, creating a **micromillimeter-sized dot** on the skin's surface. This sublimation (solid to gas) process results in the dot which is the removed (ablated) skin. This dot minimally tightens the skin in the surrounding vicinity.

Gold RF Microneedling (Fire & Ice)

Gold Radio Frequency Microneedling (RFMN) is a minimally invasive procedure to reduce the appearance of Wrinkles, Scarring, Acne Scarring, Sagging skin on the face, neck and body, Stretch Marks, and Cellulite.

Radio Frequency Microneedling (RFMN) **is safe for all skin types and skin complexion.** The addition of Radiofrequency energy to the Microneedling procedure helps to further stimulate the body's natural collagen and healing processes revealing firmer, rejuvenated skin of all skin tones.

The treatment involves the use of very fine sterilized (gold plated) tiny needles to create microscopic wounds at various predetermined depths in the dermis, **without affecting the epidermis.** The delivery of energy leads to the creation of microscopic wounds in the dermis, interspersed between intact tissue. The direct thermal heating of the dermis results in new collagen production and subsequent dermal thickening.

The presence of the intact epidermis and the surrounding dermal tissue results in rapid re-epithelialization and thus minimal downtime and risks.

At Sassy Style we combine the RF Microneedling with our **Fire & Ice** treatment (LED Photon Light Therapy Tunnel and Cold Hammer).

Treatment areas :

- Face
- Neck
- Body
- Hands
- Elbows
- Knees
- Arm skin tightening
- Breasts
- **Stretchmarks**
- **Hyperpigmentation**
- **Cellulite**
- **Scars**
- **Deep Acne Scarring**
- **Large pores**
- **Hyperhidrosis**
(excessive sweating)

Acne LED Tunnel Facial

Pulsed Ozone Plasma Technology

High-frequency voltage causes electrolysis of oxygen in the air, this produces ozone that sterilises & calms inflamed and acne-prone skin. The ozone has an anti-inflammatory effect and also opens micro-channels in the skin, to assist with product penetration and skin tightening / skin rejuvenation.
